

STORAGE VISIONS[®] 2010

AN ENTERTAINMENT STORAGE ALLIANCE[™] EVENT

Justin Sykes, Director of SSD Marketing, Micron Technology, Inc.

TITLE

Unleashing the potential of High Speed Storage Interfaces

ABSTRACT

The interfaces used to connect storage to the computing platform continue to increase this 6Gb/s SAS and SATA entering the market now. Work is already under way to define even faster interfaces. This presentation will look at SSD technology and how it is able to take advantage of these faster interfaces.

BIOGRAPHY

As Micron's SSD Marketing Director, Justin Sykes' current responsibilities focus on bringing solid state storage solutions to market. In his 13 years at Micron he has held a number of positions ranging from applications engineer to segment marketing manager. Mr. Sykes has over 16 years of experience in the semiconductor and computing industries. During this time, he has taken leadership roles in the standardization and enablement of DDR and DDR2 memory technologies. Mr. Sykes received a Bachelor of Science degree in computer engineering from California State University, Chico.
