

**Chris Bross, Senior Enterprise Recovery Engineer, DriveSavers**

## **BIOGRAPHY**

Chris Bross is a Senior Enterprise Engineer at DriveSavers Data Recovery, a leading provider of professional data recovery services. His expertise lies in RAID, NAS and SAN storage system recoveries, with a focus on UNIX, Linux and Macintosh. He has successfully recovered lost data from data storage devices that have suffered mechanical failure, software corruption, user error and a host of natural disasters. Currently, he is leading the R&D for data recovery of HDD, SSD and other emerging storage technologies.

With 16 years of data recovery experience, Bross receives numerous invitations to speak at technology trade shows including: DiskCon USA, Flash Memory Summit, HDI, Linux World, IBM Storage Symposium and Netbook Summit. Bross also receives regular requests to hold technical seminars at DELL, HP, Apple and other OEM storage vendors and drive manufacturers.
