

David Duncan, Managing Director ENCRYPTX Security Products Group, Imation

TITLE

A Secure New World for Storage - A Brave New World Session Topic

ABSTRACT

“Brave” in today’s world means having the confidence in letting data go outside your network and knowing that it is protected and managed the right way. Imation will provide an overview of key trends driving security requirements around protecting removable storage devices, as well as key technology considerations for developing a mobile data protection strategy and ideas on what you should look for in a solution from the most basic to the most secure.

BIOGRAPHY

David Duncan is managing director of ENCRYPTX Security Products at Imation, a team of research and development experts focused on advances in data security that protect, encrypt, control, and manage data at rest.” Duncan founded ENCRYPTX, which was acquired by Imation from BeCompliant Corp. in March 2011. Prior to founding ENCRYPTX, Duncan was senior vice president of Tactical Marketing Ventures, a marketing accelerator company for more than 100 technology startups. He also served as vice president of sales and marketing for RL Polk, a consumer marketing information company that was sold to Equifax Corporation. Previously, Duncan served in marketing and engineering leadership positions with Storage Technology Corporation, Martin Marietta and SRA Corporation. He worked for the National Security Agency as a cryptologist for a number of years and designed and built trusted computer systems for highly classified government programs. Duncan has a Bachelor of Science in international affairs from the University of Maryland, a Master of Science in computer science from Regis University, a Master of Business Administration (MBA) from the University of Colorado, and a degree in Chinese Mandarin Linguistics from the Defense Language Institute, Presidio of Monterey, California
