

# STORAGE VISIONS® 2015

January 4 & 5, 2015 at The Riviera, Las Vegas, NV

AN ENTERTAINMENT STORAGE ALLIANCE™ EVENT

**Elie Rosen, Masters Student, Rutgers University**

## **BIOGRAPHY**

Elie Rosen is a Masters Student at Rutgers University whose area of research is Accelerated Computing using FPGAs, particularly in how to optimize the memory-logic interaction to minimize power and improve utilization. With the increasing cost reduction, FPGAs will ultimately become ubiquitous in the mobile market as well, so there are quite a number of interesting questions to think about in terms of programmable logic for mobile applications.
