

STORAGE VISIONS® 2015

January 4 & 5, 2015 at The Riviera, Las Vegas, NV

AN ENTERTAINMENT STORAGE ALLIANCE™ EVENT

Lance Dover, Director of Product Architecture, Micron

BIOGRAPHY

Mr. Dover began his career at Intel as a System Design Engineer in the Flash Products Group where he worked on early PCMCIA and USB solid state drive designs. After several years he transitioned into the architecture team eventually becoming responsible for all externally visible product architecture definition activities and functions. As group manager, his responsibilities included active involvement with customer pathfinding, issue resolution and collateral creation with a focus on NOR and emerging memory technologies. Mr. Dover then moved on to Numonyx B.V. where he again served the same role before joining Micron Technology as the Embedded Solutions Group Product Architecture Manager. At Micron he is responsible for the internal ESG roadmap as well as memory product definition. Most recently, he has been working on embedded security architectures to improve boot security in compute systems. Mr. Dover graduated from Purdue University with a BS in electrical and electronics engineering.
