

Bharadwaj Pudipeddi, Co-founder, CTO, Head of Engineering, BITMICRO Networks, Inc.

BIOGRAPHY

Bharadwaj Pudipeddi is the cofounder and CTO of NVXL, a company building a new scale-out acceleration platform for in-memory computing, deep learning, machine learning, and SQL acceleration. A product entrepreneur and hardware architect, Bharadwaj previously worked at Intel and a number of startups in the areas of CPU design, high-performance fabrics, flash memory storage, and scalable computing. His current interests lie at the intersection of AI and data analytics with energy efficient specialized computing and storage for the data center and self-driving markets.
